## MISSISSIPPI DEPARTMENT OF ENVIRONMENTAL QUALITY

Mississippi's Approach for Improving Environmental Data Management

- Why automate and integrate?
- What is MDEQ's vision?
- How is MS achieving the vision?
- What will the system do?
- How can MS continue to implement cost effectively?

#### Why Automate?

- MDEQ's Strategic Priorities
  - To streamline regulatory processes to be more effective
  - To provide superior service to customers
  - To focus planning and budgeting to achieve performance goals
  - To make environmental information easily available

#### **OPC Organizational Structure**

Office of Pollution Control

Air

GW

HW

SW

FS

**EPD** 

**ECED** 

Steering

- Planning
- •Environmental Standards
- •State of the Environment

— Rowing

- Permitting
- •Compliance/Enforcement
- Ambient Sampling/Monitoring
- •Laboratory Services

## Drivers for Automation OPC Reengineering

- OPC Reengineering
  - To support the business processes
  - To provide multiple media view
  - To reduce burden on MDEQ staff by effective use of environmental information and technology
  - To reduce burden on regulated community by more efficient and effective management of information

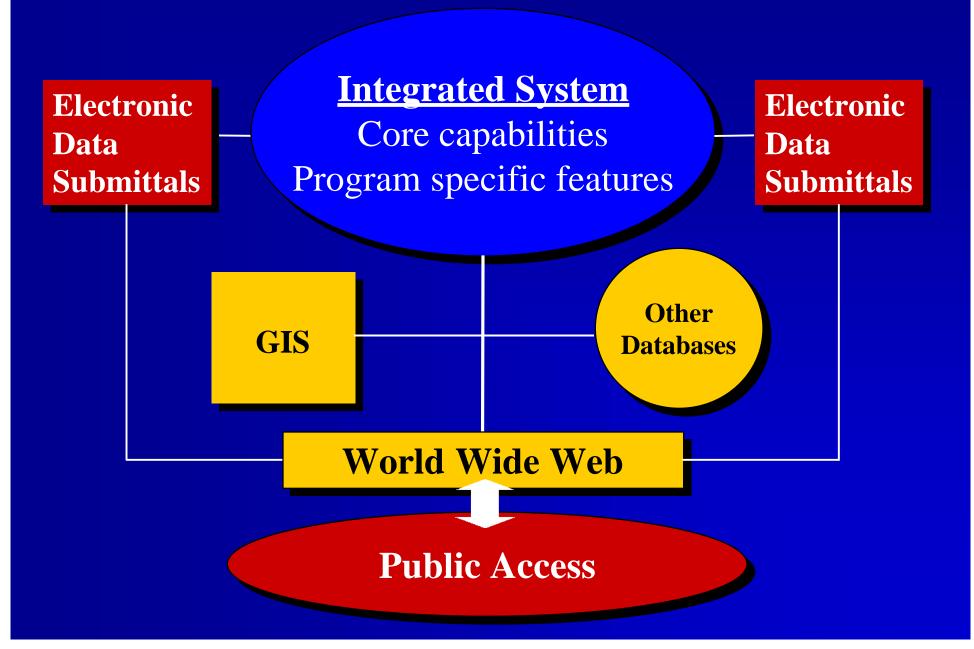

**Everything is driving toward improved environmental** information management R W n **One Stop Integrated** Strategic **Environmental** Steering Planning **Information** 

#### MDEQ's Vision

Fully integrated, geographic-based, information management system, allowing for <u>multi-media</u> evaluation of environmental information by the regulated, the regulators, and the general public.

#### Integrated System Conceptual Design

### Success on a Shoestring Budget

One Stop

# One Stop Compliance Assurance Process

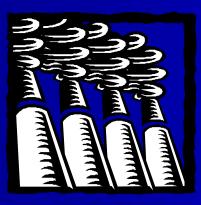

Permit conditions and requirements

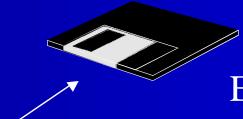

Enhanced Customer Access

Permit

Electronic Reports

# How will One Stop benefit MDEQ Customers?

- A single doorway for collection of all information required from the regulated community
- Collection of any piece of information only one time
- Collection of only information that is useful and actually used

# How will One Stop benefit MDEQ Customers?

- Customer's access to quality information
- Integrated information that are useful for multi-media, geographically based decisionmaking
- A system that will promote electronic submittal of information
- Information that is optimized for reengineered business processes

### Leveraging with other states

- Monthly conference calls with New Jersey and Louisiana
- Knowledge transfer
- Sharing system insight with New Mexico
- Leveraging enhancements with states sharing same system
